Summary

AI & Automation-focused B.Tech (CSE-AIIML) student at GLS University (CGPA 9.0+) with hands-on experience in Machine Learning, Deep Learning, Large Language Models (LLMs), Multi-Agent AI Systems, Computer Vision, Workflow Automation using n8n, and Full-Stack Development. Skilled in building end-to-end AI solutions, intelligent automation systems, and deployment-ready applications using Python, React, Node.js, FastAPI, TensorFlow, AWS, and modern development tools.

Technical Skills

Programming:	Python, Java, JavaScript, SQL, PHP, C++, C
Artificial Intelligence:	ML/DL, Computer Vision, LLMs, Prompt Engineering, Multi-Agent Systems
Frameworks & Libraries:	TensorFlow, Scikit-Learn, OpenCV, FastAPI, Flask, Streamlit, React, Node.js, Express.js
Automation & Tools:	n8n, REST APIs, Webhooks, Git, GitHub, VS Code, Power BI
Databases:	MongoDB, MySQL, Supabase
Cloud:	AWS (EC2, S3, IAM, Lambda)
Operating Systems:	Linux, Windows

Experience

- Completed **AI & Data Analytics Virtual Internship** at **Edunet Foundation, AICTE & Shell India**, gaining hands-on experience in Python, ML, Data Preprocessing, Exploratory Data Analysis (EDA), and Scikit-learn.
- Currently working as an **Automation Intern** at **Xyzon Innovations**, developing AI-powered workflow automations using n8n, REST APIs, Google Sheets, Gmail, and Telegram integrations.
- Built Machine Learning and Workflow Automation projects by applying AI concepts to solve real-world problems and improve business productivity.

Projects

Optical-Guided Thermal Image Super-Resolution (SIH 2025)

- Developed a deep learning-based model to enhance low-resolution thermal images using high-resolution RGB images as guidance.
- Implemented dual-stream EDSR architecture with feature fusion and attention mechanisms.
- Designed physics-aware loss function to preserve real-world temperature consistency.
- Achieved high performance with PSNR: 42.4 dB, SSIM: 0.92, and low RMSE.
- Built complete pipeline including preprocessing, model training, and deployment-ready system.

AI-Powered Incident Response Agent (HackBaroda 2026)

- Built a Multi-Agent AI Incident Response System for automated cybersecurity incident investigation and threat analysis.
- Developed FastAPI APIs for AI-powered threat classification and incident processing.
- Implemented LLM-based severity assessment, root cause analysis, and remediation suggestions.
- Designed an interactive React dashboard for incident tracking and AI-generated reports.
- Built a working prototype in a 12-hour HackBaroda hackathon using Multi-Agent AI, FastAPI, React, and Antigravity.

AI-Powered Workflow Automation Suite (n8n)

- Developed an end-to-end workflow automation suite using n8n, integrating Gmail, Google Sheets, Telegram, HTTP APIs, Google Maps, and OpenStreetMap.

- Built automated job application tracking, AI-powered job lead scraping, and multi-source business lead intelligence workflows to eliminate manual processes.
- Implemented data extraction, filtering, enrichment, normalization, duplicate removal, website verification, and rule-based opportunity scoring using JavaScript.
- Integrated REST APIs, webhooks, and AI services to automate notifications, reporting, and structured data management across multiple platforms.
- Designed scalable, modular workflows with error handling, scheduling, and reusable components for real-world business automation.

MediScan – Disease Prediction System

- Developed machine learning models for early detection of diseases such as Asthma, Dengue, and Pneumonia.
- Performed data preprocessing, feature engineering, and model evaluation using Python libraries.
- Integrated OCR-based PDF data extraction for automated input processing.
- Built user-friendly interface supporting real-time predictions and manual inputs.

Syntax Reviser Gamified Coding Platform (Tech Hackathon)

- Developed an interactive coding practice platform using React, Node.js, and Express.
- Implemented real-time character validation and performance tracking (WPM, accuracy).
- Designed gamification system with virtual rewards and structured learning paths.
- Built scalable backend APIs for real-time data processing.

Education

GLS University

B.Tech in Computer Science Engineering (AI/ML) – CGPA: 9.0+ (Top 10%)

2023 – 2027

Ahmedabad, India

Ultravision School

HSC (Grade: 90%)

2022 – 2023

Trimurti Ultravision School

SSC (Grade: 89%)

2019 – 2020

Certifications

- Oracle AI Foundation Associate
- Deloitte Data Analytics Job Simulation (Forage)
- NPTEL Recommender Systems
- Green Skills and Artificial Intelligence

Achievements

- Selected for Smart India Hackathon (SIH) 2025 (ISRO Problem Statement)
- Participated in HackBaroda 2026 and developed an AI-Powered Incident Response Agent.
- 1st Prize at College Tech Hackathon
- Winner of Code Relay Competition
- Chess: 2nd Place (State Level), 1st Place (College Level)

Languages

- English
- Hindi
- Gujarati
